## About Bhagavad Gita

Bhagavad Gita is an ancient Indian text that documents the dialog between two great warriors, Krishna, the teacher and Arjuna, the student. For the past several millennia people from all walks of life have discovered practical spiritual wisdom in Gita to empower their lives. The knowledge in Gita provides a deep understanding of human nature enabling one to live and interact in the world with expansion, ease, and fulfillment.

## Convention Objectives

The Convention is hosted by Center for Inner Resources Development – North America (CIRD-NA), a global Knowledge Institution. This is the second global dialog on Bhagavad Gita convened as part of a long-term effort under the inspirational guidance of Swami Bhoomananda Tirtha, a renowned Spiritual Master from India. Through a series of global dialogs, CIRD-NA will present Bhagavad Gita as a secular and historical text available to all as a universal life manual.
